github.com/SVSS13

01 PROFESSIONAL SUMMARY

Software & Cloud Engineer with production experience in backend pipeline monitoring, automated anomaly detection, and cloud observability. Skilled in Python, SQL (PostgreSQL, MySQL), AWS CloudWatch, and CI/CD pipelines with Docker and Jenkins. Proven track record of engineering automated job-tracking systems, scheduled anomaly detectors, and diagnostic dashboards that eliminate pipeline downtime across enterprise healthcare workflows.

02 TECHNICAL SKILLS MATRIX

Languages & Scripting

Python SQL Bash / Shell Java C R

Databases & Ingestion

PostgreSQL MySQL MongoDB Query Optimization

Web Frameworks & APIs

Django Flask FastAPI Node.js RESTful APIs

Cloud & Observability

AWS CloudWatch Logs CloudWatch Metrics AWS EC2

Linux / Unix

DevOps & Architecture

Docker Jenkins GitHub Actions Ansible Power BI

Core Engineering Practices

Anomaly Detection Pipeline Health Telemetry

Agile / Scrum

03 PRODUCTION EXPERIENCE

Exdion Health (Exdion Solutions) — Technology Intern

Feb 2026 – Present | Bengaluru, India

- ◆ **ExdionCode (AI Medical Coding & Pipeline Observability Platform):** Engineered automated data monitoring pipelines combining **MySQL** database records and **AWS CloudWatch Logs** to track real-time patient visit batch workflows and data ingestion throughput.
- ◆ **Anomaly Detection Engine:** Developed a scheduled monitoring service executing automated pipeline health checks **every 10 minutes** to detect, flag, and alert on stalled or hung batch processing jobs.
- ◆ **Stuck Job Trends Analytics:** Built a diagnostic sub-module to capture, store, and visualize historical pipeline failure timelines, identifying recurring processing bottlenecks and accelerating incident resolution.
- ◆ **CASH (Healthcare Claims Assurance Service):** Designed backend data ingestion pipelines and telemetry utilizing **PostgreSQL** and **AWS CloudWatch** for high-volume auditability and financial transaction verification.

04 KEY TECHNICAL PROJECTS

PCB Defect Detection & Visual Quality Inspection System

Python • Flask • MATLAB Engine API • OpenCV

Built an automated visual inspection web tool integrating MATLAB image processing algorithms via MATLAB Engine API with a Flask backend. Executed edge detection and morphological filtering to detect PCB surface anomalies and generate diagnostic reports.

Informex – Interactive Dataset Analytics Platform

R • Shiny • ggplot2 • Tidyverse • Corrplot

Developed an interactive web app for CSV data parsing, automated statistical summaries, dynamic correlation matrices, and scatter clustering to accelerate exploratory data analysis for multi-dimensional datasets.

Cat vs. Dog Image Classifier GUI

Python • Scikit-Learn • OpenCV • Joblib • Tkinter

Trained and benchmarked classical ML classifiers (SVM, KNN, Decision Trees) with OpenCV feature extraction; deployed a standalone Tkinter GUI with Joblib model persistence for real-time image classification.

05 EDUCATION & CERTIFICATIONS

B.Tech in Computer Science & Eng.

CGPA: 7.65 / 10.0

Dayananda Sagar University, Bengaluru
2022 – Oct 2026 (Completed: Oct 28, 2026)

Class XII (Senior Secondary)

Score: 79%

The Narayana Institutions, Bengaluru
2020 – 2022 (State Board)

✓ Linux Shell Scripting & Foundation (Infosys Springboard)

✓ Practical Jenkins & CI/CD (Infosys Springboard)

✓ Image Processing with MATLAB (MathWorks)

✓ Scrum Foundation (Infosys Springboard)
