PRODUCTION ENGINEERING EXPERIENCE

`[Enterprise Cloud & Telemetry Pipelines]`

Exdion Health (Exdion Solutions) — Technology Intern

`Feb 2026 – Present | Bengaluru, India`

- **ExdionCode (AI Medical Coding & Pipeline Observability Platform):** Engineered automated full-stack telemetry dashboards combining **MySQL** database status and **AWS CloudWatch Logs** to monitor real-time patient visit batch workflows and data throughput in Agile sprint cycles.
- **Anomaly Detection Engine:** Developed a scheduled monitoring service executing automated pipeline health checks **every 10 minutes** across data ingestion stages to proactively detect, flag, and alert on stalled batch jobs.
- **Stuck Job Trends Analytics:** Built a diagnostic sub-module capturing historical pipeline failure timelines, tracking bottleneck KPIs and accelerating incident triage time for mission-critical healthcare workflows.
- **CASH (Healthcare Claims Assurance Service):** Designed backend data ingestion pipelines and REST endpoints utilizing **PostgreSQL** and **AWS CloudWatch** for high-volume financial transaction verification and auditability.

FEATURED TECHNICAL PROJECTS

`[Full-Stack, AI/ML & Cloud Systems]`

AI Cyberpunk Full-Stack Cloud Platform (Live: sujalsvs.in ↗) `React (Vite) • Django • Groq AI • Docker • CI/CD • AWS`

- Architected a full-stack personal cloud platform with a responsive **React (Vite) frontend** and **Django REST backend**. Integrated Groq LLM chatbot endpoints, automated GitHub Actions CI/CD deployment pipelines, telemetry analytics, and Nginx reverse proxy on AWS.

Automated Pothole Detection & Road Hazard Assessment (Final Year Capstone) `Python • OpenCV • Scikit-Learn ML • CNN • Flask Web UI`

- Developed an automated computer vision system using OpenCV, adaptive thresholding, contour segmentation, and **Scikit-Learn Machine Learning / CNN models** to detect potholes from camera feeds and generate geo-tagged hazard logs.

Aerial Object Detection & Airspace Surveillance System `Python • YOLOv8 • MobileNetV2 (99% Acc) • Transfer Learning • CNN`

- Engineered an AI deep learning system classifying birds vs. drones in aerial video. Implemented MobileNetV2 transfer learning alongside **YOLOv8** for real-time bounding-box object localization in surveillance feeds.

PCB Defect Detection & Visual Quality Inspection System `Python • Flask • MATLAB Engine API • OpenCV Edge Detection`

- Built an automated visual inspection web tool integrating MATLAB image processing via MATLAB Engine API with a Flask backend to execute edge detection, morphological filtering, and automated anomaly reporting.
