

01 PROFESSIONAL SUMMARY

Software & Cloud Engineer with production experience in backend pipeline monitoring, automated anomaly detection, and cloud observability. Skilled in Python, SQL (PostgreSQL, MySQL), AWS CloudWatch, and CI/CD automation with Docker and Jenkins. Proven track record of engineering automated job-tracking systems, scheduled anomaly detectors, and diagnostic dashboards that eliminate pipeline downtime across enterprise healthcare workflows.

03 PRODUCTION EXPERIENCE

Exdion Health (Exdion Solutions) — Technology Intern Feb 2026 – Present Bengaluru, India - ExdionCode (AI Medical Coding & Pipeline Observability Platform): Engineered automated data monitoring pipelines combining MySQL database records and AWS CloudWatch Logs to track real-time patient visit batch workflows and data ingestion throughput. - Anomaly Detection Engine: Developed a scheduled monitoring service executing automated pipeline health checks every 10 minutes to detect, flag, and alert on stalled or hung batch processing jobs. - Stuck Job Trends Analytics: Built a diagnostic sub-module to capture, store, and visualize historical pipeline failure timelines, identifying recurring processing bottlenecks and accelerating incident resolution. - CASH (Healthcare Claims Assurance Service): Designed backend data ingestion pipelines and telemetry utilizing PostgreSQL and AWS CloudWatch for high-volume auditability and financial transaction verification.
--

04 KEY TECHNICAL PROJECTS (PORTFOLIO: SUJALSVS.IN | GITHUB: @SVSS13)

Automated Pothole Detection & Road Hazard Assessment (Final Year Capstone) Python • OpenCV • Computer Vision • CNN / ML • Flask Developed an automated computer vision system to detect road potholes from video/camera feeds in real time. Implemented image preprocessing, adaptive thresholding, contour segmentation, and classification models to generate geo-tagged hazard logs.
AI Cyberpunk Interactive Portfolio Platform (Live: sujalsvs.in) React • Django • Groq AI • DevOps CI/CD • REST APIs Engineered an AI-powered personal portfolio integrating Groq LLM chatbot, automated CI/CD deployment pipelines, telemetry analytics dashboard, and interactive UI with Android webview deployment support.
Aerial Object Detection & Airspace Surveillance System Python • YOLOv8 • MobileNetV2 (99% Acc) • Transfer Learning • CNN Engineered a deep learning system classifying birds vs. drones in aerial imagery. Implemented MobileNetV2 transfer learning alongside YOLOv8 for real-time bounding-box object localization in surveillance video.
PCB Defect Detection & Visual Quality Inspection System Python • Flask • MATLAB Engine API • OpenCV Built an automated visual inspection web tool integrating MATLAB image processing via MATLAB Engine API with a Flask backend to execute edge detection, morphological filtering, and automated anomaly reporting.

05 EDUCATION & VERIFIED CERTIFICATIONS

 B.Tech in CSE Dayananda Sagar University 2022 – Oct 2026 (Grad: Oct 28) CGPA: 7.85	 Class XII (Senior Sec.) The Narayana Institutions 2020 – 2022 (State Board) 79%	 Class X (Secondary) Aditya Birla Public School 2012 – 2020 (CBSE) 72%
★ Galactic Problem Solver (NASA Space Apps Challenge 2024)	✓ TechA Linux Foundation Certification (Infosys Springboard)	
✓ Practical Jenkins CI/CD Certification (Infosys Springboard)	✓ Scrum Foundation: Scrum in Action (Infosys Springboard)	
✓ MATLAB Onramp (100% Verified) (MathWorks Training)	✓ Product Management Simulation (Electronic Arts / Forage)
